Modular Ear Plugs

Modular plugs are Lab made Plugs using Medical Grade silicone that is heat cured under pressure for increased durability with multi-functional capabilities. Modular plugs have the ability to be either used as a filtered plug or a solid ear plug based on position of the lanyard. Now you can connect to your radio or communication system.

It's an affordable way to custom fit your cell phone or radios.

Same color choices as other lab plugs.

- Modular Filtered Lab Plugs (includes 85dB limiter acoustic filters, pop cord and cleaning tool)
